PROFESSIONAL SUMMARY

A motivated Computer Science undergraduate (CGPA 3.80/4.00, 4x Dean's List) with strong hands-on experience across full stack web and desktop development, database design, and machine learning research. Skilled in building production-ready applications with C#, Java, PHP, and Next.js, backed by practical knowledge in Linux environments and network security. Author of three research papers spanning computer vision, NLP, and network defense including a study on DDoS detection. Proven leader with a strong track record of event execution and team coordination through active university roles. Seeking an entry-level Software Engineer role to apply software design principles and technical problem-solving to real-world challenges.

PROJECTS

Blood Bank Management System | C#, .NET Framework, MS SQL Server

- Developed a desktop application to manage blood donation and distribution, including donor registration and recipient request tracking.
- Built real-time blood stock tracking with SQL database integration and a secure login authentication system.
- Automated alerts for blood bag expiration dates and low inventory threshold levels.

Campus Event Management System | PHP, MySQL, JavaScript

- Built a web-based campus event management system to handle event creation, student registration, payments, ticket generation, and attendance tracking.
- Implemented role-based access for Admin, Organizer, Student, and Staff using MVC architecture and session-based authentication.
- Developed CRUD operations, AJAX-based search, automated payment/ticket workflows, QR ticket verification, and activity logging.

EDUCATION

Bachelor of Science in Computer Science & Engineering
American International University - Bangladesh (AIUB)
August 2023 – Expected October 2027 | GPA: 3.80 / 4.00
Recipient, Dean's Academic Excellence Certificate (4x)

Higher Secondary Certificate (HSC)
Motijheel Govt. Boys' High School | 2022 | GPA: 4.83 / 5.00

Secondary School Certificate (SSC)
Willes Little Flower School and College | 2020 | GPA: 5.00 / 5.00

RESEARCH & PUBLICATIONS

- Published Research: Featured "Explainable Machine Learning for Hemoglobin-Independent Anemia Severity Prediction" as Pending.
- Pending Research: Featured "Code-Mixed Bangali-English Intent Recognition for Chatbots" as Pending Publication / Under Review.

- Pending Research: Featured "A Comparative Study of XGBoost and LSTM for DDoS Detection with Explainable Feature Selection on the CIC-DDoS2019 Dataset" as Pending Publication / Under Review.

KEY SKILLS

Programming Languages: C++, C#, Java, Python, SQL
Frameworks & Tools: .NET Framework, Visual Studio, IntelliJ IDEA, VS Code, MySQL Workbench
Core Competencies: Object-Oriented Programming (OOP), Data Structures & Algorithms, Relational Database Design
Soft Skills: Problem Solving, Team Collaboration, Technical Writing, Event Coordination, Cross-Functional Communication

VOLUNTEERING & LEADERSHIP

AIUB Drama Club (ADC) | Volunteer & Event Coordinator

- Coordinated logistics and on-stage operations for Curtain Rise, AIUB's annual drama festival.
- Managed team activities and event flow for ADC Nationals, an inter-university drama competition.
- Co-organized large-scale university events, demonstrating adaptability, time management, and communication under pressure.
